

Workshop on the Village Diagnosis

Saturday November 30, 2013 • 8:30 to noon

The City of Pointe-Claire is pleased to invite all its residents, business owners and interested citizens to a workshop on the diagnosis of Pointe-Claire Village.

Last spring, the City appointed Convergité to produce a diagnosis for Pointe-Claire Village. Since then, Convergité has carried-out various surveys within the business community and general population, has met with many stakeholders and has analysed the state of the village. During the workshop, Convergité will share its preliminary diagnosis and invite participants to reflect, in small groups, on the prominent issues and the possible strategic actions that could be considered. The results of the workshop will allow Convergité to finalize its diagnosis.

Mandatory registration

Number of participants in the discussion is limited. In order to prepare the correct amount of material for the workshops, persons who wish to participate must necessarily register before November 25 at 4 PM, by phone or email.
