

Snowman Mug

Materials:

- 2 Porcelain pens (black and orange)
- White porcelain mug

IMPORTANT: Before using the pens for the first time, shake well before opening and gently push the tip on a sheet or folded tissue to make the ink run down the tip.

Instructions:

1. Clean and dry the mug before applying.
2. Softly push the tip of the black pen on the top tier of the mug to create the eyes of your snowman. Widen the eyes by circling outward until desired size.
3. Make 6 to 8 smaller circles on the bottom tier of the mug to create the mouth.
4. Wait a few minutes for the ink to dry.
5. To make the nose, softly push the tip of the orange pen on the middle of the mug and draw an oval. Draw a smaller one connected to it, and keep going until you reach the end of the nose (about 3-4 ovals in total).
6. Let the mug dry in the open air for 24 to 72 hours.
7. To make sure your snowman does not disappear in the dishwasher, put the mug up on a baking sheet and bake in the oven at 300°F for 35 minutes. Let cool before putting in the dishwasher.
8. Clean your snowman mug before use.
